IPSO Newsletter: August 2018

Dear Friends

Warm greetings to all! Hope you have had a good year so far. It is only a few months away from our annual meeting in Kyoto, Japan. This year's congress programme promises to be very exciting. We hope to meet you very soon. For those who are unable to attend, we will provide a report of the meeting in the *IPSO Newsletter 2019*.

In the meantime, let me update you on:

- Upcoming Executive Committee (EC) elections
- IPSO Education Initiatives
- Updates on 2018 Congress in Kyoto
- Messages from your Secretary & President
- IPSO Kyoto Congress Preliminary Programme

Registered for the congress? Have a *problem case* to present? Signed up for *IPSO Dinner*? If you have not already registered, [Register Online Now!](https://siop.kenes.com/2018) (<https://siop.kenes.com/2018>)

Remember: Only paid-up IPSO members get a discounted rate

UPCOMING EXECUTIVE COMMITTEE ELECTIONS

The following position of office will be up for election soon after the IPSO annual congress in Kyoto in Nov 2018:

(1) Executive Committee Member-at-Large

A nominating committee will be formed with 8 current EC members and 4 active members. The latter 4 active members will be chosen through online-election in August 2018. Please lookout for the ballot papers.

Lookout for the notifications! Nominate your colleagues or yourself !
Only active members will be eligible to be nominated for the upcoming elections.
Nominate by writing to either our secretary, Chan Hon Chui (surgeryforchildren@gmail.com) or our president, Robert Shamberger (robert.shamberger@childrens.harvard.edu) or anyone in the nominating committee.
The slate of candidates will be announced at our Business Meeting on Nov 16th 2018.

YOUR IPSO MEMBERSHIP RENEWAL

A fiscal year is a period that we use for accounting purposes. IPSO's fiscal year is January 1 – December 31. Therefore members need to pay dues or subscriptions early every calendar year. Members who pay dues timely will benefit from access to newsletters and members-only areas on IPSO website, reduced registration fees at annual meetings, voting rights and committee memberships. *So, please pay your dues today !*
Log onto www.ipsosurgeons.org to renew your membership.

IPSO EDUCATION COMMITTEE – ANNOUNCEMENTS !

1. IPSO Online Webinar Series. These are interactive seminars started since last year. They are in the form of a lecture of about 40-45 minutes, followed by time to ask questions and comment via the chat box. Participation is simple and only requires a good internet connection. [Go to http://meeting.uct.ac.za/ipso/](http://meeting.uct.ac.za/ipso/). Thanks to Sharon Cox who made this possible through the University of CapeTown's Surgical Skills Training Centre's platform to run this programme.

NEXT ONLINE SEMINAR:

Management of Pulmonary Metastases. Steven Warmann

Friday 14 September 2018, 2pm South African Time (UTC+2)

Follow the link to attend: <http://meeting.uct.ac.za/ipso/>

2. Surgical Oncology Site on Cure4Kids website. Since last year, the Education Committee started a Surgical Oncology Site under 'Groups' on the Cure4Kids website. Members are reminded to contact Sharon Cox (sharon.cox@uct.ac.za) if they would like to have access to the 'Surgical Oncology Group' on the Cure 4 Kids website (www.cure4kids.org) . This site will soon be populated with paediatric surgical oncology educational resources in the form of recorded web lectures and relevant papers.

UPCOMING

IPSO Congress in Kyoto, Japan Nov 16-19, 2018

IPSO's annual congress 2018 will be held at the ***Kyoto International Conference Center (KICC)*** in Kyoto, Japan. Once again, it will be held in conjunction with the annual SIOIP meeting. The congress will continue to have highlights in the IPSO Keynote Lecture, Daniel Hays Surgical Skills Seminar, IPSO-PROS Symposium and SIOIP-IPSO-PROS Joint Symposium, Problem Cases Session and more. The preliminary programme has been included at the end of this newsletter.

IPSO Programme Committee (co-chaired by Sabine Sarnacki and Simone Abib, comprising of members Andrea Hayes-Jordan, Chan Hon Chui, Tatsuro Tajiri, Jed G Nuchtern, Joerg Fuchs, Pablo Lobos and Michele Ilari) worked hard to set-up this year's programme. Credit must also be given to last year's Programme Committee who contributed to the topics for this year's keynote lectureship and symposia. Since April 2018, the committee reviewed all the abstracts that were submitted and scored them. This was followed by phase 2 when the SIOIP Scientific Committee performed a review. Phase 3 was when our Programme Chairs finally designed the programme right down to the every minute of the day.

Tatsuro Tajiri, our local organizer, will be coordinating our congress activities. He is Professor and Chairman at the Department of Pediatric Surgery,

Graduate School of Medical Science, Kyoto Prefectural University of Medicine. Professor Tajiri assisted by his associate Dr Shigehisa Fumino have been a great force in the preparation for this year's IPSO congress.

Pre-congress Activity Nov 15th, 2018. IPSO has been invited to participate in a IPSO/JSPHO joint pre-congress educational event. This has been incorporated into the 60th annual meeting of the Japanese Society of Pediatric Hematology/Oncology.

Date: Nov 15 (Thu), 2018, 10:00AM–12:00PM

Venue: Miyakomesse (<http://www.c-linkage.co.jp/jspho2018/english.html>). **Note that the venue is a distance away from the KICC.**

"Current status and future prospects for clinical trials of rhabdomyosarcoma and non-rhabdomyosarcoma soft tissue sarcoma in Japan, Europe and the United States"

Chairs: Hosoi Hajime, MD, PhD, Douglas Hawkins, MD

- 1) The Biology and Treatment of Rhabdomyosarcoma: the Children's Oncology Group Experience. (Douglas Hawkins, MD, COG STS Committee chair)
- 2) Rhabdomyosarcoma_ Lessons from the EpSSG trials. (Gianni Bisogno, MD, PhD, EpSSG chair)
- 3) TBD (Andrea Ferrari, MD, EpSSG member)
- 4) Results From The First Japanese Rhabdomyosarcoma Group Study (JRS-I) and The Strategy of The Next Treatment Protocols (JRS-II). (Hajime Hosoi, MD, PhD, JRSG (JCCG RMS Committee) chair)
- 5) TBD (Yoshiaki Kinoshita, MD, PhD, IPSO, chair of surgery discipline committee of JRSG)

Special registration desk will be placed at JSPHO reception for participants from IPSO.

IPSO Programme Highlights

Daniel Hays Surgical Skills Seminar

Nephron-sparing surgery in Wilms tumour
New navigational techniques in oncological resections
Management of surgical complications

Keynote: Critical role of surgery in pediatric cancer care

IPSO-PROS Symposium: Organ and fertility preservation

SIOP-IPSO-PROS Symposium: Multidisciplinary palliative care

Problem Cases Session will be held on November 16th in the same auditorium at KICC as the rest of the IPSO sessions. It is an excellent opportunity for surgeons to bring difficult and challenging cases for discussion. A multidisciplinary panel of paediatric oncologists, surgeons, radiation oncologists, and radiologists will be available.

Now is the moment to recall problem cases from the last few months which you would like to discuss, or even current cases where discussion at IPSO could help with your management.

Please email the cases to Sabine Sarnacki, Simone Abib or Chan Hon Chui before the meeting. (Sabine Sarnacki: sabine.sarnacki@nck.aphp.fr, Simone Abib: simoneabib@uol.com.br, Chan-Hon Chui: chchui@surgeryforchildren.com)

IPSO Annual Business Meeting will be held on November 16th after the IPSO Problem Cases Session. It is the responsibility and obligation for all members to attend this meeting.

IPSO Dinner November 17th, 2018 will be held at the Fortune Garden Kyoto. It is a great time for the IPSO community to meet and catch-up with each other after 2 days of intensive scientific programme. Despite arranging for a large restaurant, we have been overwhelmed by an exceptional response at the dinner's ticket sales. In order to cope with the higher number of attendees, we have further increased the capacity of the dinner. From now on, the purchase of dinner tickets will have to be done through our local organizers only using the attached forms and please send to pedsurg@koto.kpu-m.ac.jp

IPSO DINNER

Sat, November 17th, 2018

@

FORTUNE GARDEN KYOTO

(<https://www.fortunegarden.com/en/>)

386-2 Ichinofunairi-cho, Nijo-Sagaru, Kawaramachi-dori, Nakagyo-ku, Kyoto

Dinner: 8:00 pm to 10:00 pm

Ticket fee: 80USD

Bus transportation will be provided from KICC to FORTUNE GARDEN (and return).

If there is any question or any request concerning food (vegetarian, food, allergy), please contact us pedsurg@koto.kpu-m.ac.jp.

Local organizer: Tatsuro Tajiri, MD
Secretary general: Shigehisa Fumino, MD

Please register in advance by Sep 30th, 2018

IPSO DINNER Application Form

Your name (country)	
Other request (Vegetarian, Halal, Allergy, etc)	

Please send a completed application form by e-mail to pedsurg@koto.kpu-m.ac.jp by **30th Sep** so that we can confirm numbers.

We have already received too many applications, so **only IPSO members can participate** dinner. We are so sorry for our small capacity.

Tickets for the dinner will be purchased **by cash (80USD)** at FORTUNE GARDEN reception desk.

Secretary's Corner

I am very encouraged by the number of new membership applications this year. In addition, we are seeing a higher number of quality abstracts being submitted and be presented at the upcoming Kyoto Congress. I believe that through our communications and meetings, IPSO will be able to improve cancer care in children. Please bring our congress banner and our brochure (found on our webpage www.ipsosurgeons.org) to all who may be interested.

We look forward to your active participation in the upcoming meeting. Mark your calendar and remember to register for the meeting early. I continue to look forward to your comments and feedback. Please feel free to contact me at secretary@ipsosurgeons.org.

Chan Hon Chui
Secretary, IPSO

President's Corner

I look forward to seeing many IPSO members at our meeting in Kyoto Japan. This is a storied Japanese city with a rich cultural history and many remarkable architectural sites to see. Drs. Sabine Sarnacki and Simon Abib and their Program Committee have assembled a remarkable academic program for this year. As outlined above, there are many special lectures and high quality abstract presentations. I know we will all learn a great deal from this Program. This meeting will also provide the opportunity to see many old friends and to meet new colleagues involved in pediatric surgical oncology. I would like to thank Tatsuro Tajiri for all of his work on arranging the social program for this meeting. Travel safely and join us for this meeting.

Robert C. Shamberger
President, IPSO

IPSO ANNUAL CONGRESS, KYOTO
Nov 16th – 18th, 2018
PRELIMINARY PROGRAMME

Friday, November 16th, 2018

WELCOME, PRESIDENT'S ADDRESS AND LOCAL ARRANGEMENTS

Robert Shamberger (USA)

Local organizers (Japan)

8:15-8:30

IPSO: SESSION 1: LIVER

8:30-9:45

- Surgical treatment strategy for advanced hepatoblastoma: Resection versus Transplantation
Hajime Uchida (Japan)
- Hepatoblastoma: Role diffusion weighted MRI (dw-mr) in detection of satellite lesions not detected with multi-phase CT scans
Kanika Sharma (India)
- The usefulness of the navigation surgery using indocyanine green fluorescent imaging for the hepatoblastoma patients
Ryota Souzaki (Japan)
- Eight surgery cases for pulmonary metastasis of hepatoblastoma by indocyanine green fluorescence navigation
Michinobu Ohno (Japan)
- Evaluation of the impact of liver regeneration after partial hepatectomy on hepatoblastoma intrahepatic and distant growth by using patient-derived Xenografts in nude mice
Marianna Cornet (France)
- Benign tumors of the liver in children and adolescents: the experience of a single institution
Patrizia Dall'igna (Italy)
- Extended liver resections or liver transplantation? Single center experience
Simone Abib (Brazil)

9:45 – 10:15 – Circulating Break

IPSO: DANIEL HAYES SURGICAL SKILLS SEMINAR

- Nephron-sparing surgery in Wilms tumor
Jorg Fuchs (Germany)
- New navigational techniques in oncologic resections
Eiso Hiyama (Japan)
- Management of intra-operative complications of oncological surgery
Marc Wijnen (Netherlands)
- Discussion

11:45 – 13:45 - Lunch Break, Poster Viewing, Visit Exhibition

IPSO: SESSION 2: NEUROBLASTOMA

13:45 - 15:15

- Cutting it to the core in Neuroblastoma biopsy: How many cores are enough?
Sesi Hotonu (UK)
- Factors affecting perioperative outcomes in children undergoing neuroblastoma surgery in a tertiary cancer hospital in India- a prospective observational study.
Nayana Amin (India)
- Surgical outcomes in patients with high risk neuroblastoma, the European high risk neuroblastoma-1 trial, a UK single centre experience
Sesi Hotonu (UK)
- Treatment effect of neuroblastoma of neonates and small infants
Yongwei Chen (China)
- Intra-Operative Photographic Imaging for Objective Documentation of the Surgical Resection in Neuroblastoma
Jakob Stenman (Sweden)
- Minimally invasive surgery for Neuroblastic tumours, a SIOPEN international study
Hany Gabra (UK)
- Implementation of an international standard for systematic surgery report for neuroblastoma: a SIOPEN, COG and GPOH initiative
Lucas Matthysens (Belgium)
- Postoperative chylous ascites after resection of pediatric retroperitoneal malignancies: interventions and impact upon adjuvant therapy
Aodhnait Fahy (Canada)
- Postoperative lymphatic leakage after surgery for advanced neuroblastoma- is it a rare complication?
Alexandra Pohl (Germany)
- Reduction of complication rate in neuroblastoma surgery after centralization of care
Merel Jans (The Netherlands)

15:15 – 15:45 - Circulating Break

IPSO: SESSION 3: PROBLEM CASES

15:45- 17:30

Local Interdisciplinary Panel

RADIATION ONCOLOGY *Hiroshi Fuji (Japan)*

RADIOLOGY *Osamu Miyazaki (Japan)*

PAEDIATRIC ONCOLOGY *Kenichiro Watanabe (Japan)*

PAEDIATRIC SURGERY *Akihiro Yoneda (Japan)*

17:30 - 18:30 - IPSO: BUSINESS MEETING

18:30 - 19:30 - OPENING CEREMONY

19:30 - WELCOME NETWORKING RECEPTION

Saturday, November 17th, 2018.

8:40 - 9:10

KEYNOTE 01

The History of SIOP

9:10-9:40: Coffee Break, Poster Viewing, Visit Exhibition

IPSO: SESSION 4: (PBC-SESSION): THE ROBERT ARCECI BEST OF IPSO

9:40 – 11:10

- Management of thoracoabdominal neuroblastoma: a 13-years' experience
Chan-Hon Chui (Singapore)
- Multidisciplinary surgical strategy for dumbbell neuroblastoma: a single center experience of 33 cases
Luca Pio (France)
- Treatment and outcome of patients with thoracic soft tissue ewing tumors - a report from the cooperative weichteilsarkom studien gruppe trials
Guido Seitz(Germany)
- Customize approach for upfront or delayed resection using radiological characteristics in unilateral, non-metastatic pediatric renal tumors: a prospective study
Sajid Qureshi(India)
- Robot-assisted laparoscopic management of renal tumors in children : preliminary results
Luca Pio (France)

11:10 – 11:20 – Circulating Break

IPSO ORAL POSTER SESSION

11:20- 12:20

- Circulating mycn DNA as a tumor-specific marker in neuroblastoma
Jonathan Karpelowsky(Australia)
- The chick embryo – a new experimental model to study tumour biology and test cancer therapies for neuroblastoma
Paul Losty (UK)
- One-lung ventilation in pediatric thoracic surgical oncology
Nune Matinyan (Russia)
- How does surgery impact childhood cancer patients? The lasting experiences and needs of survivors and their parents
Claire E Wakefield(Australia)
- A multicenter study of 33 cases with synovial sarcoma
Wang Shan (China)
- Treatment for abdominal inflammatory myofibroblastic tumor in children: an analysis of twelve years of experience
Jiajian Hu(China)
- Perioperative complications after partial hepatectomy for hepatoblastoma
Marianna Cornet (France)
- Surgical treatment for large solitary focal nodular hyperplasia of liver in children: an analysis of twelve years of experience
Jiajian Hu(China)

- Solid pseudopapillary neoplasm of the pancreas in children: Hacettepe experience
Bilgehan Yalcin(Turkey)
- National survey on the management of Wilms tumor
Ahmed Elgendy (Egypt)
- The Surgical Choice for Unilateral Thyroid Carcinoma in Pediatrics: Lobectomy or Total Thyroidectomy?
Wei Yao (China)
- Neuroblastoma – the association of anatomical tumour site , molecular biology and patient outcomes
Adeline Salim (UK)

11:20 - 11:50

KEYNOTE 02

Autophagy

11:50 – 13:20: Lunch Break, Poster Viewing, Visit Exhibition

13:20 - 13:30: Circulating Break

IPSO: SESSION 5: RENAL TUMOURS

13:30- 14:30

- Prospective study of systematic retroperitoneal lymph node sampling for wilms tumors and comparison with random lymph node sampling
Monica Bhagat (India)
- Factors responsible to stage III disease in the patients with Wilms tumor treated in the JWITS-2 study
Takaharu Oue (Japan)
- New criteria for laparoscopic nephrectomies in pediatric renal tumors
Rodrigo Chaves Ribeiro (Brazil)
- Minimally invasive surgery for Wilms tumours: can we safely expand the SIOP umbrella protocol criteria?
Yves Heloury(Australia)
- Plasty and salvage of the kidney in treatment of bilateral Wilms tumor- Experience of 53 cases in 10 years at a single institution
Huanmin Wang(China)
- Wilms tumour – is aggressive surgery required in patients with vena cava disease extension ? Impact of chemotherapy and radiotherapy on tumour thrombus and viability
Tristan Boam (UK)

IPSO: SESSION 6: GCT

14 :30-15 :30

- Testicular germ cell tumor: a national multicentric study
Rodrigo Chaves Ribeiro (Brazil)
- Ovarian tumors in children: how common are lesion recurrence(s) and metachronous disease? Results of a nationwide study
Sarah Braungart (UK)
- Surgical management of pediatric ovarian tumors – classical 'open' or minimally invasive surgery?
Sarah Braungart (UK)

- Sacrococcygeal teratoma- long term outcomes in terms of urological and bowel problems, cosmesis and gait
Kashish Khanna (India)
- Surveillance for boys with localized testicular non-seminomatous germ cell tumors: Hacettepe experience
Bilgehan Yalcin(Turkey)
- Surgical management of ovarian tumours - a 25 year single centre experience
Felcity Arthur (UK)

15:30-16:00: Circulating Break

16:00 - 16:30

KEYNOTE 03: IPSO

Critical role of surgery in pediatric cancer care

- Simone Abib (Sao Paulo, Brazil)

Chair: S.Sarnacki

16:30-16:40: Circulating Break

IPSO – PROS Symposium: Organ and fertility preservation

16:40 - 18:10

- IPSO : *Sabine Sarnacki (France)*
- PROS : *Mariko Kawamura (Japan)*

Closing remarks – *Robert Shamberger(USA)*

18:10: Poster Viewing (Poster Area with food and drink)

Sunday November 18st, 2018.

IPSO SESSION 7: MISCELLANOUS

8:30 -9:30

- Infections in long-term venous access devices: should the catheter always be withdrawn?
Simone Abib(Brazil)
- Ewing's sarcoma of ribs: outcome of surgical management as a part of multimodality treatment
Sandeep Agarwala(India)
- Equivalent outcome with radiotherapy only versus surgery as local treatment modality in head and neck Ewing sarcoma family of tumors
Sameer Bakhshi(India)
- Neoadjuvant Regional Intraarterial Chemotherapy in Combination with Systemic Chemotherapy for Treatment of Advanced Pelvic Malignant Tumors in Children
Min-ju Li (China)
- Duodenum-preserving pancreas head resection in the treatment of pediatric benign and low-grade pancreatic tumors: a ten-year single-center review
Hong Qin(China)

- An interdisciplinary surgical approach (pediatric surgery/neurosurgery) allows successful tumor resection in specific complex conditions of pediatric solid malignancies
Steven Warmann(Germany)
- Liver transplant as treatment of the metastatic gastrointestinal stromal tumors in children not responding to medical therapy
Michele Ilari(Italy)

9:30-9:40: Circulating Break

9:40-10:10: Keynote 04

D'Angio Lecture:

PROS: Heavy particle radiotherapy

IPSO/PROS/SIOP: Multidisciplinary palliative care

10:40- 12:10

- IPSO: Palliative Surgery: A Surgeon's Perspective
Alessandro Inserra (Italy)
- PROS: Management of multidisciplinary palliative care
Hiroshi Fuji (Japan)
- SIOP: Integrating Palliative Care into Pediatric Oncology Improves Outcomes
Justin Baker (USA)

.....

11:50 – 13:20: Lunch Break, Poster Viewing, Visit Exhibition

13:20 - 13:30: Circulating Break

.....

ABSTRACTS FOR POSTER DISPLAY

1. Horner's syndrome in infants and children – should we routinely screen for neuroblastoma? *S Braungart (UK)*
2. Surgical treatment of pancreatic tumors in children *A Lukashenko(Ukraine)*
3. "Pneumobladder": a new mini-invasive approach for the diagnosis and treatment of intravesical tumors in children *M Ilari (Italy)*
4. Central venous catheter positioning in pediatric oncology: systematic review and meta-analysis of the group of young pediatric surgeons of Europe *L Pio (France)*
5. The incidence of associated abnormalities in patients with sacrococcygeal teratoma *M Kremer(The Netherlands)*
6. Tunnelled central venous access devices in small children: a comparison of open versus ultrasound-guided percutaneous insertion in children weighing ten kilograms or less *L Viernoom(New Zealand)*
7. Neuroblastoma with opsoclonus-myoclonus-ataxia syndrome (OMAS): outcomes of surgical management over twenty years *S Anand(India)*
8. Surgery options and results of treatment of children with solid pseudopapillary tumors of the pancreas *D Rybakova(Russia)*
9. Minimally invasive thoracic and abdominal surgery in pediatric solid oncology *S Talypov(Russia)*
10. Pediatric non-Wilms renal tumors: review of clinico-pathological behaviour, treatment and outcome from a tertiary care center, India: a single institution experience *B Jindal(India)*
11. Congenital mesoblastic nephroma - a single centre series *M Pachi(UK)*
12. Treatment of nephroblastoma with venous thrombus: single-center experience *K Dong(China)*
13. Evaluation of a bony landmark-based method for teaching percutaneous insertion of subclavian venous catheters in paediatric patients *A Loh(Singapore)*
14. The evidence for cytoreductive surgery and (hyperthermic) intraperitoneal chemotherapy ((H)IPEC) in children: a systematic review of the literature *L Mattyssens(Belgium)*
15. Tunneled non-cuffed centrally inserted central catheters in pediatric oncology: initial experience *R Chaves Ribeiro(Brazil)*
16. Use of subcutaneously anchored securement devices in preventing central venous catheters dislocation in children affected by cancer *A Crocoli(Italy)*
17. Peripherally inserted central catheters in the treatment of children with cancer: results of a multicenter study *M Rykov(Russia)*
18. When lightning strikes twice! - management of familial neuroblastoma *S Braungart(UK)*
19. Possibilities of endosurgery in diagnosis of tumor diseases of thoracic and abdominal localization at children. *D Rybakova(Russia)*
20. Radiologic-guided biopsies of pediatric tumors: a systematic review *V Montano(Italy)*
21. The role of pediatric surgical services in optimal management of childhood cancers *H Halepota(Pakistan)*
22. Resection of presacral mass in currarino syndrome is mandatory *S Sarnacki(France)*
23. Primary Liver Germ Cell Tumor: a rare entity *Simone Abib(Brazil)*
24. Clinical presentation and Outcome of Paediatric non-Wilms' renal tumours. *D Yadav(India)*
25. Cardiac teratoma *S Braungart (UK)*
26. Testicular metastasis in Wilms tumor: case report *Simone Abib(Brazil)*
27. Complications after excision of retroperitoneal tumours in children. *B Kumar (India)*
28. Hepatic sinusoidal obstruction syndrome induced by D-actinomycin in Right-sided Wilms Tumors. *H Wei (China)*
29. Hepatoblastoma with intracardiac extension - Surgical approach *Simone Abib(Brazil)*
30. Human Papillomavirus in Retinoblastoma—Is it relevant? *S Sen (India)*
